

**Moseley, still in Bloom**

**Plants for Sale!**

This year, we will miss the floral displays that have become familiar in Moseley and admired over the summer in recent years. Although Moseley in Bloom bought the plants and Birmingham City Council Parks and Nurseries staff have grown them for us, they are unable to plant up the baskets and planters and maintain them over the season in the usual way. However, the good news is that we will have the plants in Moseley and indeed, our volunteers will plant some of them in the village. This week, Moseley Gifts and Gardens on Oxford Road will take delivery of the plants from the Council and will be selling them. This means that Moseley residents will have the opportunity to buy a variety of excellent bedding plants in the vibrant colours that we have come to expect from our displays. Moseley in Bloom will also recoup the cost. Below is a list of the plants with the numbers of each available. It gives an idea of the scale of our usual operation. The plants will be available for sale from Thursday, 28 May.

Begonia Golden Picotee (44)
Begonia Non Stop Yellow with Red and Black (179)
Bidens Solaire Semi Double (134)

Fuchsia Trudi Davro (60)
Geranium Ivy Leaf Decora Rouge (30)
Geranium Supercascade Rose (74)
Geranium Inidgo Sky (201)
Lobelia Richardii (94)
Nepeta (101)
Petunia Alpetunia Blue (101)
Petunia Alpetunia Glacier Sky (141)
Petunia Alpetunia Soft Pink (40)
Sanvitalia Golden Queen (70)
Verbena Endurascape (40)

## Open Gardens

If you are considering filming your garden for the Virtual Open Gardens on 27 June you will find it helpful to read the Guide prepared by the Open Gardens team. This tells you how to make the video and record the sound. You can find it at

## Cleaning up Moseley

Last Sunday, volunteers from Moseley in Bloom and Moseley Litterbusters did sterling work cleaning up the centre of the village. While we have been locked in our homes, the weeds have had a great time, growing undisturbed and, although there have been fewer people about, there was still plenty of litter. How does that happen? Thank you to those who helped.
